Why a BWT robotic pool cleaner, are they the best choice?

BWT B-Line robotic pool cleaners combine performance, beauty and functionality, all at a very attractive price. Above all, they have one feature that sets them apart: hyperfine BWT filtration.

Floor, walls and water line

You want a robot that cleans the pool floor, walls and water line? The BWT B200 model is made for you.

Easy filter cleaning

An indicator light located on the transformer alerts you when the filter is full and needs to be cleaned. The filter can be released and pulled out from above and then cleaned without getting your hands dirty.

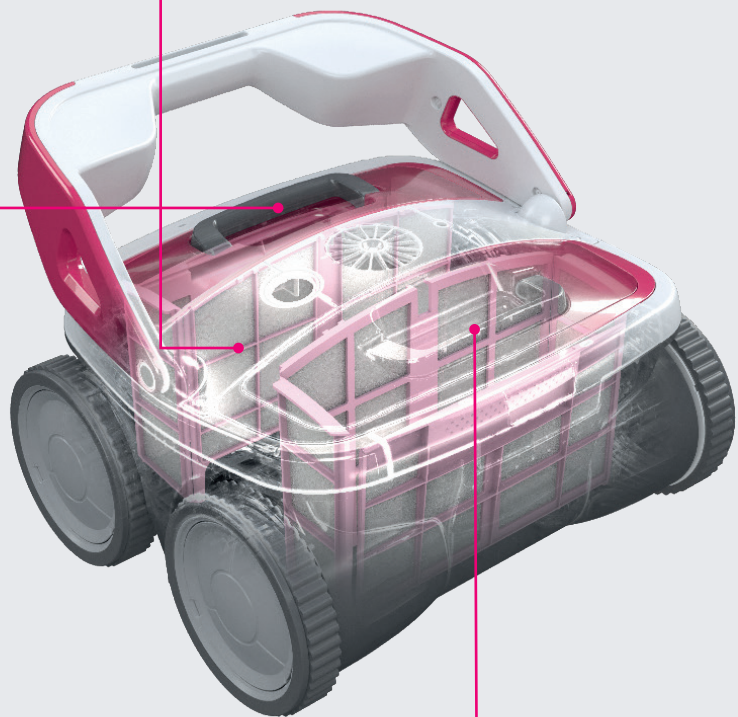

Adjustable intake

BWT robotic cleaners feature the most powerful suction of any robot on the market. Suction can be increased up to twofold, thanks to precise adjustment of the intakes valves.

Among the finest filtration performances on the market

The 4D filter consists of elastic 3D microfiber loops, which, coupled with the vibrating motion, maximises water throughput. The vibration improves the suction power and prevents clogging of the filters. The 4D filter traps even the tiniest impurities. From leaves to grains of sand, nothing escapes.

Transparent filter lid

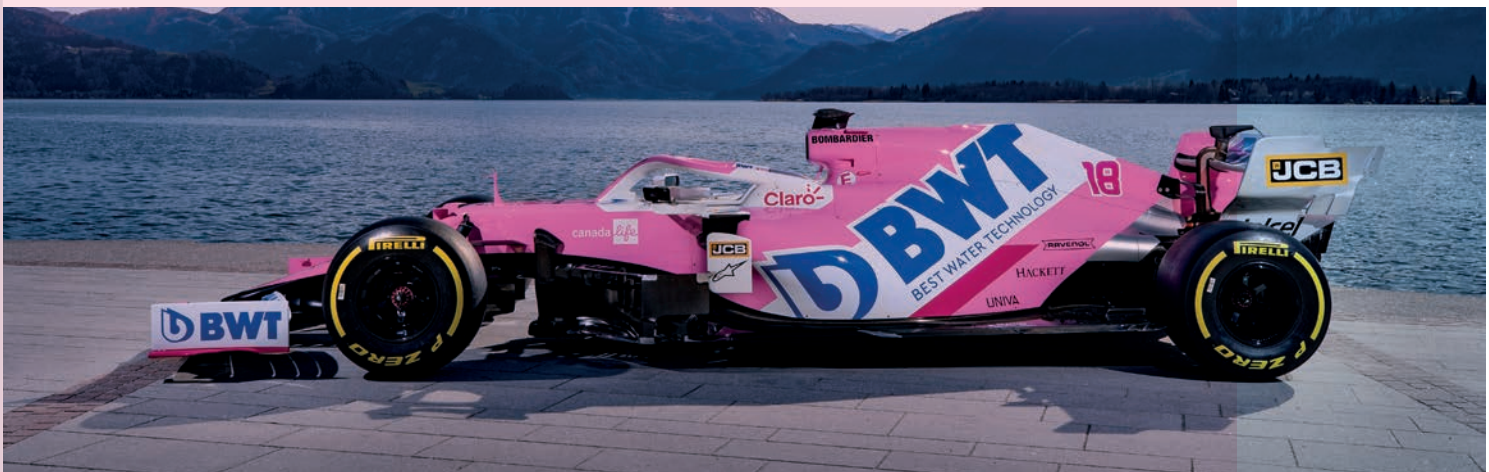

The transparent filter lid allows monitoring of filter fouling without having to remove the filter from its housing. For example: When you remove the robotic pool cleaner from the pool, you can easily see if the filter needs to be cleaned or if the B200 is ready to go again.

Cutting-edge Techniques and innovation

Just as Formula 1 engineers seek precision and high-performance, BWT teams work to design and create the best robotic cleaners on the market.

This is why Formula 1 cars are emblazoned with the BWT livery and logo on racing circuits the world over.

In the competition for leadership in technology and innovation, BWT robotic pool cleaners are leading the charge.

Fast cleaning

Length of the cleaning cycle: one and half or two hours depending on the condition of the surface.

Efficient travel

With four large wheels, BWT robotic cleaners cope with any obstacles, moving easily between toys forgotten on the pool floor by your children. Simple and robust travel, perfect for a family pool.

4 drive brushes + additional rotating brush

The 4 drive brushes dislodge deposits and leave the surface perfectly clean. The additional rotating brush ensures impeccable cleaning of the pool floor. "BWT clean!"

Pool size	For pools up to 8 m long (any shape or surface finish)
Cleaning type	Floor, walls and waterline
Cleaning cycle duration	1.5 or 2 hours
Filter type	4D, hyperfine microfibre, transparent filter lid
Full filter indicator	Yes
Filter access	Easy Top Access
Type of brushes	4 PVA brush wheels
Extra brush	Rotating PVC brush
Platform	4 WD
Suction flow rate	19 m ³ /h
Cable length	16 m, premium grey
Anti-tangle swivel	Yes
Adjustable intake	Yes, Higher suction power
Dimensions (L x W x H)	35.5 x 41 x 31.1 cm
Weight	10.5 Kg
Guarantee	2 Years

B200

A world made for you!

EXCELLENCE, INTELLIGENCE, INNOVATION

The BWT world is made for you, and its robotic pool cleaners are designed with you in mind.

Don't hesitate, step into an exceptional world.
